**MPEG 1 Animations for Windows
Media Player and/or some DVD Players**

PANARAMANIA

Instructions For Observing Animations

You will need to have installed *Windows Media Player* onto your computer in order to view animations. For those who do not have this software installed already, a free download of the program is available at:

<http://www.microsoft.com/windows/windowsmedia/9series/player.aspx>

Place CD into disk drive of computer. Call up files. Click to play files in numerical order or whatever order you like. Each file will play separately, so each must be accessed individually. Recommend selecting "Full Screen" view.

SOME DVD players will play these MPEG 1 files. Some DVD players will play only the audio or will not run the animation in time with the audio. Some DVD players will play some of these files accurately, but not all of them. Try it out and see what works on yours, but the computer will give the most reliable play of all the files. Have Fun!
